Accessibility / contrast standards

Use WCAG AA as the target: normal text 4.5:1, large/bold text 3:1, meaningful graphical/UI objects 3:1. Do not rely on colour alone; use labels, icons, status words and shape differences for RAG and priority states.

Pair	Text	Background	Ratio
White on Navy Base	#E8EDF2	#061A36	14.7:1
Muted on Navy Base	#8A9BB0	#061A36	6.1:1
Orange on Navy Base	#E8561A	#061A36	4.8:1
Ink on White		#FFFFFF	17.4:1
Ink on Light Paper		#FAF7F1	16.3:1
Orange on Light Paper	#E8561A	#FAF7F1	3.4:1
White on Orange	#FFFFFF	#E8561A	3.6:1

RAG / priority rule

- Green:**

Implemented / sound
- Amber:**

Partial / unknown
- Red:**

Missing / material risk
- Blue:**

Improvement opportunity
- Slate:**

Deferred / not this cycle

Every RAG object must include a visible text label. Dots and colour blocks are decorative only, never the only information carrier.

Font standard

Display: Playfair Display (fallback Georgia / Times New Roman) UI/body: DM Sans (fallback Aptos / Arial / Segoe UI) Editorial: Source Serif 4 (briefing narrative only)

Presentation / PPT

Cover title	44-52pt	White on navy or ink on light
Subtitle / client	18-22pt	White / muted text
Section title	40-46pt	White on navy
Slide title	28-34pt	Ink or white
Body	18-22pt	Ink / white
Bullets	16-20pt	No smaller than 16pt
Footer / doc ID	8-10pt	Muted; never overlay logo

Documents / PDF / Print

Cover title	24-32pt	Ink or white
H1	22-26pt	Ink / navy
H2	16-18pt	Ink
H3	12-14pt	Ink
Body	10.5-11.5pt	Ink on white/paper
Tables	8.5-10pt	Ink; high contrast
Footer / page no.	8-9pt	Grey/ink; repeat doc type

KHITView outputs

Hero title	38-58px	White on app navy
Section title	27-38px	White / ink by mode
Body	16-18px	White or ink
Meta labels	12-14px	Muted; not critical alone
Cards / tiles	14-16px	Label plus colour
Print body	10.5pt	Black on white
Print footer	8.5-9pt	Grey/black

Usage rules

- Covers and section dividers may use prominent swirls. Standard content pages should be cleaner and more readable.
- Invoices and SOWs use clean white/light layouts; no prominent swirls except optional cover/accent strip.
- Document IDs sit in header/footer zones only. They must never overlap the logo or client title.
- KHITView generated reports must use controlled CSS tokens; consultant review remains mandatory before publication.

Output families

Family	Use for	Visual style	Logo / mark rule	Notes
PPT / Deck	Client briefings, reviews, propo...	Navy/orange, cover swirls allowed	Cover: KH110 only; inner pages: small KH111 or none	Use slide masters; no ad-hoc images
Invoice	Billing	White/light, minimal orange accent	KH110 in header; no swirls	Readable when printed mono
SOW	Scope, terms, deliverables	White/light with controlled tables	KH110 cover/header; footer ID	Tables and bullets must be clean
Proposal	Pre-sale or post-review options	Light document with optional cover	KH110 cover; KH111 section accent optional	Use callouts sparingly
Briefing PDF	Narrative post-consult output	Editorial light register	Header text or KH110; print-safe	Screen can be warm; print becomes white
Review PDF	Evidence-grade review	Dark digital + print-safe export	KH110 top; KH111 in components only if helpful	RAG labels plus colour
KHITView HTML	Auto-generated portal outputs	Controlled CSS tokens	No generated logos in CSS backgrounds	HTML and PDF styles must align

KHITView output standard

- Service Briefing: retain narrative/editorial light style for screen, but print must be black text on white with controlled margins.
- Service Review: retain dark app/report style for browser reading, but output PDF must use standard type sizes, RAG labels, page numbers and no clipped components.
- All generated outputs: no background image may contain embedded logos, text fragments, or social artwork. Assets must be separated: background, logo, text, data.
- AI-assisted content remains subject to consultant review and approval before publication.
